SUMMARY

Backend + AI Agent Developer with experience building 5+ LLM-powered systems, including multi-agent workflows and RAG pipelines, cutting manual effort by up to 80% in research, SEO, and product development. Skilled in Python, FastAPI, PyTorch, LangChain, and Docker, with a track record of designing scalable backend services and deploying AI-driven applications in real-world use cases.

WORK EXPERIENCE

Beacon Minds JAN 2026 - PRESENT
Digital Marketing Intern

- Built end-to-end AI automation pipelines using Python, Claude Code, and N8N – automating lead generation via BNI, local business scraping + outreach, keyword analysis, and AI backlink tracking.
- Reduced repetitive intern-level tasks by ~70% through custom automation workflows.

Tech Stack: Python, Claude Code, N8N, Ahrefs, GSC

ControlshiftAI JULY 2025 - AUG 2025 (AUSTRALIA) (REMOTE - OFFSHORE)
Artificial Intelligence Intern

- Developed backend services powering AI-driven content automation, integrating across multiple microservices and reducing manual intervention by 50%.
- Architected and deployed robust, high-availability API endpoints.

Tech Stack: Python, FastAPI, LangChain, Cursor, Trae, Docker

Acmegrade SEP 2023 - FEB 2024 (REMOTE)
Artificial Intelligence Intern

- Built and deployed a spam detection system achieving 90% accuracy on real-world email datasets.
- Improved model performance by fine-tuning hyperparameters and feature selection, resulting in 15% faster predictions and reduced false positives.

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Matplotlib

BornToDie OCT 2023 - NOV 2023 (REMOTE)
Game Tester

- Conducted 50+ gameplay sessions and reported 15+ critical bugs.

Tech Stack: PC Game Builds, Discord, Google Sheets

EDUCATION

2022 - 2025
B.Sc. Computer Science
Shankar Narayan College, Mumbai

2020 - 2022
HSC in Science
Mithibai College, Mumbai

SKILLS

Programming & Data:

- Python
- Data Analysis
- NumPy
- Pandas

AI/ML:

- PyTorch
- NLP
- Generative AI
- LLMs
- AI Agents
- Prompt Engineering

Frameworks & Tools:

- FastAPI
- LangChain
- Postman
- Docker
- Git/GitHub

Concepts:

- AI Agentic Orchestration
- Multi-Agent Systems
- RAG
- Vector Databases
- AI Context Management

PROJECTS

Oryntiq – AI Visibility Analytics Platform

- Architected a three-phase, multi-agent platform for AI Engine Optimization (AEO), tracking brand ranking and sentiment across LLMs (e.g., Gemini, Claude).
- Developed an Analytics Engine to calculate key metrics, including the AI Visibility Index (AVI), Sentiment Score, and AI Model Bias, exposed via 15+ REST API endpoints.

FoundASpark.AI – Startup Idea Analyzer

- Built an end-to-end autonomous AI system in Python + FastAPI to analyze startup ideas and auto-generate pitch decks, cutting preparation time by 80% .
- Designed modular multi-agent workflows integrating LLM reasoning, RAG, and automated presentation generation.

RankMeUp – SEO AI Agent

- Crafted an AI-powered agent that analyzes websites and generates SEO keyword suggestions, reducing manual research effort by 70%.
- Implemented scalable backend pipelines with FastAPI + Python, integrated with Chroma DB for semantic search.

Edit4Me – AI Code Editor

- Architected a command-line AI code editor that generates/edits code from prompts, cutting manual coding time by 80%.
- Powered by Gemini + Python, with modular design for extensibility.

EXTRA CURRICULAR ACTIVITIES AND ACCOMPLISHMENTS

- Won 1st place (Creativity category) and ranked Top 30 overall at Mini Jame Gam; also contributed to Jame Gam #29, serving as Game Programmer & UI Developer in 5-member teams for both events.
- Served as Head of Department for a college tech/cultural event, managing 30+ volunteers and ensuring seamless end-to-end execution.

INTERESTS

Exploring Tech
Delves into new technologies and crafts experimental AI systems to stay ahead of trends and promote innovation

Gaming & game design
Enjoy strategic and systems-based games to sharpen agentic thinking

Reading AI Research
Stay updated with the latest advancements in LLMs and autonomous agents

Automation & smart systems
Build personal automations to optimize real-world tasks with AI workflows.
Firm believer that any task done more than twice should be automated.
